

# Customer Successful Installation

# gevasol Ping

March 2026

- Oil and gas production
- Offshore oil platforms

## Large Mechanical Seal - 8"

Last week Gevasol ettem sealing solutions engineers installed at one of its largest customers - "Dead Sea Works", a large mechanical seal, 8" (203mm).

It is placed in a very complex position, within a large pumping system. It is an ideal example of the close relationship & cooperation with our customers.

### The Challenge

Design produce and install:

- A large single mechanical seal
- Replace a Double Seal
- Overcome complicated installation conditions

### The Solution

Develop and install a single mechanical seal that can perform under the conditions faced by the double seal, and replace it.
